

## **Instruction for exercise on addressing key national water issues and achieving water goals through an IWRM approach**

### **Aim:**

To understand what is the point of IWRM and why it is an approach worth taking

### **Form:**

- 5 groups (same as for working session A) with one resource person in each group
- Group work facilitation, 1 facilitator/rapporteur per group
- One big wall space for first presentation
- Flip charts for second presentation
- Projector for complementary presentation by facilitator

### **Process:**

- What are the main issues and problems for water resource management in your countries? Write on cards. 10 mins
- Post cards on one wall in clusters
- Redistribute a few issues to each group and ask them to think about how an IWRM approach can help solve these issues
- Nominate presenter/rapporteur

### **Output/reporting:**

- Presentation by rapporteur (5minutes) using flip chart
- Facilitate discussion after each presentation
